### **Abstract:**

This study aims at finding out the relationship between language labs and the possible effective ways for better performance of English language by students specially of colleges. Globalization, social media and AI are changing the way we teach and learn. Language laboratories in most of our Indian institutions are used as tools of satisfying accreditation requirements and also developing an interest for utilizing the laboratory towards job acquisition. However, the use of language labs in Indian colleges still not satisfying from statistical point of view. The paper tries to delve into the challenges of teaching using the language laboratories. Using effective language laboratories in teaching English is essential in teaching of English and mastering better features of speaking with understanding by students. The study endeavours to find recommendations for using of language labs in the teaching of English in colleges of India for effective communication skills.
